Claim 47, lines 8 and 9, "without bonding to the resilient contact structures" has been deleted and ", wherein each of said plurality of resilient contact structures comprises an electrically conductive structure, and said electrically conductive structure is a spring, wherein when pressed against one of said contact elements of said test board, said spring generates a contact force sufficient to establish an electrical connection with said contact element" substituted therefor.

Claim 71 has been cancelled.

In the specification, page 1, lines 12-27 have been deleted along with any previous amendments thereto and replaced with:

"This patent application is a continuation of commonly owned U.S. Patent Application No. 09/468,620, filed December 21, 1999 (now U.S. Patent No. 6,455,023), which is a continuation of commonly owned U.S. Patent Application No. 08/839,771, filed April 15, 1997 (now U.S. patent No. 6,032,356), which is a divisional of U.S. Patent Application No. 08/558,332, filed November 15, 1995 (now U.S. Patent No. 5,829,128), which is a continuation-in-part of commonly-owned U.S. Patent Application No.
